## Change Over Switch

## Application

The LW26 series rotary switch mainly applies to 440V and below, AC 50Hz or
240 V and below DC circuits. For breaking and closing, change-over of circuits under infrequently manual operation. And the typical application are: control switch of 3 phase motors, control switch of switch gear, control switch of instruments, and change-over switch of machinery and welding machine.

The series comply with the GB 14048.3, GB 14048.5 and IEC 60947-3,IEC 60947-5-1. The LW26 series rotary switch has two derivatives: LW26GS Pad-lock type and LW26SKey-lock type. Both of them are applicable in circuits when an physical control is required.

## Working Conditions

LW26-16
(1) Ambient temperature DO NOT exceed $40{ }^{\circ} \mathrm{C}$. and the average temperature, measured over a period of 24 hours. DO NOT exceed $35^{\circ} \mathrm{C}$.
(2) Ambient temperature should not be below $-25^{\circ} \mathrm{C}$.
(3) Should not be installed above 2000 m above sea level.
(4) The humidity should not exceed $50 \%$ when the ambient temperature is $40^{\circ} \mathrm{C}$ and higher humidity is allowed for lower temperature.
